- I. Grower _____ County _____
- II. Crop and Variety _____ Cert. # _____
- III. Previous crop and variety harvested with equipment _____
- IV. Check box when the appropriate item is completed:

A. Combine

- | | |
|--|-----------------------------------|
| 1. Open sieves and cleanout doors | 4. Stop machine, shut down engine |
| 2. Increase airflow to maximum | 5. Remove the header |
| 3. Run machine in place at field RPM 2-3 minutes | 6. Remove the sieves |

WET METHOD*

- 7. Thoroughly flush with water (the more volume and pressure the better) from the top down:
 - a. Grain tank and unloading auger
 - b. Cylinder and concave areas
 - c. Straw rack and grain sieves
 - d. Header and feeder areas
 - e. Cross augers and grain elevators
- 8. Dry out, reset sieves and airflow, proceed to combine

DRY METHOD*

- 7. Brush, blow or vacuum from the top down:
 - a. Grain tank and unloading auger
 - b. Cylinder and concave areas
 - c. Straw rack and grain sieves
 - d. Header and feeder areas
 - e. Cross augers and grain elevators
- 8. Proceed to combine; keep separate first 50 bushels to market as commercial or feed grain, **not seed**

B. Seed hauling and handling - - Flush, blow, brush or vacuum:

- | | |
|-------------------------------------|-------------------------------|
| a. Grain beds or trucks or trailers | c. Storage bins or boxes |
| b. Augers or elevators | d. Sacks or bags (if not new) |

V. Cleanup procedure was followed

Signature of Cleaner/Technician and/or Grower

Date

* Use Wet Method for small fields and/or high value crops; use Dry Method for larger fields and/or lower value crops where a portion of the seed can be discarded as commercial feed grain.
